

Security (System) Engineering with Generative AI

Homework Assignment no. 3

Student name: Brehon Parker FAU ID: Z23222679

Algorithm:

- I. Edit above your student name and homework number.
- II. Edit below the missing information between < and >.
- III. During development, for every significant task given to the agent you must:
 - A. Take a screenshot of your VSCode window clearly showing the prompt you gave to the agent and the response it gave you back. Your FAU ID must be visible on the screenshot.
 - B. Take a screenshot of your VSCode window clearly showing at least the top few lines of code that were generated or modified by the agent. Your FAU ID must be visible on the screenshot.
 - C. Insert the screenshots into the homework Word document, along with the task prompt given to the agent pasted as regular text.
- IV. When finished, convert the Word document to PDF and upload on the homework Canvas page.

Application name: Incident Compass

Application Description: Incident Compass adds cited policy search, validated incident triage, and a restricted Terminal to a stateful LangChain agent. It uses fictional classroom policy and environment credentials. Twelve offline tests pass. Live Gemini requires verification. Keyword retrieval can miss synonyms; triage depends on supplied facts; memory resets on exit.

Repeat for each step:

Task prompt: "new lab. https://icardei.github.io/gensec-web/labs/G03.2_hw_wk3/index.html?index=..%2F..gensec-web#0 do it ASAP." Required evidence: insert genuine VS Code screenshots of coding-agent prompts and responses, plus generated code, with Brehon Parker or Z23222679 visible.
